C72OUM,
1972

Dedication

GRANT OSTRANDER GRAVES, M.D.

January 21, 1905 — February 7, 1972

Dr. Graves was a man of vision and accomplishment. He published many papers. He authored three books. He led an active, well organized department. He was an excellent teacher. He initiated the establishment of the Department of Medical Education. His innovation of two tracts for the study of gross anatomy led to the development of the present Pilot Medical School Program. He encouraged the creative use of multi-media in the teaching of anatomy. He was on the faculty of the Creative Problem Solving Institute. He practiced medicine. He was a climber of mountains, a gardener and groundskeeper, and a better than average photographer. He was a devoted husband and father.

Never blinded by the desires of personal recognition and dedicated to the improvement of medical education, Dr. Graves would have considered an emotion laden tribute an affront to his pride. Two quotations best characterize him. The first, from the Canterbury Tales, serves as the caption for his picture as Man of the Year — "And gladly wolde he lerne and gladly teche." The second may well be his own — "Never shall I forget that to the State of Ohio I owe my education. I hope I may be able to honor such a trust."

Resolution in Memoriam March 7, 1972
The Ohio State University, College of Medicine

CADUCEAN
1972*

*College of Medicine
The Ohio State University
Columbus, Ohio*

To study the phenomena
of disease
without books
is to sail an uncharted sea

. . . while to study books
without patients
is not to go to sea at all

— *Osler*

School of Allied Medical Professions, page 152

Knowledge makes the
physician
Not the name, or the
school.
— Paracelsus

A clinician is complex. He is part craftsman, part practical
scientist, and part historian.
— Thomas Addis

It is not a 'case' we are treating;
it is a living, palpitating,
alas too often suffering,
fellow creature.
— *John Brown*

The first qualification
for a physician
is hopefulness.
— James Little

College of Medicine

The College of Medicine

In 1913 the Ohio Legislature authorized the establishment of a college of medicine at The Ohio State University, and the University Board of Trustees then activated that college by entering into a contract to accept the properties, faculty, and functions of the then Starling-Ohio Medical College of Columbus. Through the Starling-Ohio Medical College and its predecessors, the present College of Medicine, established in 1914, can trace a continuity of medical education in Ohio to the year 1834, when the Medical Department of Willoughby University on Lake Erie was first chartered.

Present facilities include Hamilton Hall, Starling-Loving Hall, Means Hall, Wiseman Hall, Upham Hall, Dodd Hall, University Hospital, and the recently completed Medical Administration Center and Medical Basic Science Building. Under construction are the Health Sciences Library and Ambulatory Teaching Facility, which are soon to be joined by a new hospital.

Effective October 1, 1970, Dr. Richard L. Meiling was appointed to the newly-created position of Vice-President for Medical Affairs, the Ohio State University. Dr. Meiling was formerly Dean of the College of Medicine and Director of the University Hospitals, a post he had filled since 1961.

As Vice-President for Medical Affairs, Dr. Meiling will be responsible for the continuing planning, development, and management of the Ohio State University Medical Center, both the existing hospitals and \$51 million in new facilities. His responsibilities also extend to the coordination of the affiliated hospital programs, the new Mental Retardation Facility, animal laboratories, regional medical programs, the Medical Library, and non-academic aspects of the College of Medicine.

*Richard L. Meiling, M.D.
Vice President for Medical Affairs
Director, University Hospitals*

Administration and Faculty

Dear Graduates of 1972:

Your years as an intern and resident will be exciting, demanding, challenging, and educational. In the midst of fatigue, stress, and more responsibility, you will grow in your abilities to meet the crises of the desperately ill and the injured, to solve difficult diagnostic problems, and to deal with the problems of the sick, the disturbed. With great assurance I can say that you will be proud of the education you have received at this College of Medicine, and you will recognize that you have been well prepared for the next step in your career.

But never before in the history of our profession has the young physician been confronted with as many and as serious problems as will you and your associates. Social change is proceeding at an unprecedented rate, political pressures are profoundly changing the medical care system, individual liberties are being submerged to serve the masses, man's pressure upon himself is damaging the quality of his life. Yet in the midst of this constant necessity for the physician to adjust to so many profound changes, he must at the same time constantly struggle to absorb the growing avalanche of new scientific information that threatens to overwhelm us all. In the next decade medical information will double — the half life of what you have learned in medical college is only about 10 years. We sincerely hope that you are prepared to be a "life-long learner."

The years that you have been a student in this college have been characterized by profound change — new buildings, innovative new curricula, an enlarged faculty of high stature, a student body that each year has grown better, more research of higher quality for the benefit of mankind — all for the benefit of you and your patients.

As you leave The Ohio State University College of Medicine upon your graduation, you will be scattering to hospitals all over the entire country. Many of you will ultimately establish your practice in other states, but we know that most of you will ultimately establish your practice in the State of Ohio. I know you will have a fine career in your chosen profession — the practice of medicine which is one of the oldest and noblest of professions. We hope that you will all frequently revisit your alma mater.

On behalf of your faculty let me wish you the very best. Your accomplishments in your student years have been great, but the best is yet to come. There is no greater and deeper pleasure than to be of service to one's fellow man.

Sincerely,

John A. Prior, M.D.

Dean

The Assistant Deans

DEPARTMENT OF ANATOMY

GEORGE GAUGHRAN, Ph.D.,
Professor and Acting Chairman

L to R: Drs. Dom, Martinek, Hayes, Hostetler, J. Eglitis, King, Negulesco, Gaughran, St. Pierre, Beran, Vernall, Graves, Delphia, Sucheston, Ackerman, Humbertson, I. Eglitis, Martin, Hines, Troiano.

DEPARTMENT OF PATHOLOGY

JACK GEER, M.D.,
Professor and Chairman

First Row: Drs. MacPherson, Geer, Clausen, Liss, Gursel. *Second Row:* Drs. Smetters, van Soestbergen, Assor, Vilorio, Old. *Third Row:* Drs. Leeb, Boesel, Amos, Huang, Okino. *Fourth Row:* Drs. Baba, Murphy, Sharma, Murad, Stevenson, Majmudar, Cozzarelli.

DEPARTMENT OF MEDICAL MICROBIOLOGY

HENRY CRAMBLETT, M.D.,
Professor and Chairman

L to R: Drs. Hamparian, Azimi, Thomas, Haynes, Kapral, Hilty, Cramblett, Bowman, Lang, Somerson, Perkins, Ottolenghi, Saslaw, Pollack.

DEPARTMENT OF PHARMACOLOGY

BERNARD MARKS, M.D.,
Professor and Chairman

Seated: Drs. Walker, O'Neill, Marks, Hollander.
Standing: Drs. Knowlten, Dutta, Lindower, Sakai, Goldman, Couri, Stephen, Dickey

DEPARTMENT OF PHYSIOLOGICAL CHEMISTRY

DAVID CORNWELL, Ph.D.
Professor and Chairman

L to R: Dr. Cornwell, Dr. Brierly, Mr. Fowler, Drs. Merola, Addanki, Boggs, Devor, Och, Matthews, Scott, Richardson, Panganamala, Alben, Webb, Eyring.

DEPARTMENT OF PHYSIOLOGY

ROBERT LITTLE, M.D.
Professor and Chairman

L to R: Drs. Lipsky, Hendrich, Smith, Grossie, Pieper, Nicolosi, Little, Delahayes, Kunz, LeBrie, Michal, Hanson, Weiss, Hiatt, Nishikawara, Angerer, Lessler.

DEPARTMENT OF MEDICINE

JAMES V. WARREN, M.D.
Professor and Chairman

DEPARTMENT OF MEDICINE DIVISION DIRECTORS

Seated: Drs. Tennenbaum, Bromberg, Balcerzak, Skillman, Warren. *Standing:* Drs. Lowney, McCoy, Ruppert, Allen, Metz, Ferris, Greenberger, Perkins.

DEPARTMENT OF MEDICINE HOUSESTAFF

First Row: Drs. Dixon, Adlard, Falko, Pantano, Spohr, Dreisbach, Boleman, Leier, Tight, Warren. *Second Row:* Drs. Stanley, Dawson, Temesy-Armos, Smiarowski, Auslander, Green, Kolibash, Baehler, Cline, Roschack. *Third Row:* Drs. Bar, Crockett, Bond, Glynn, Grodner, Mallory, Halla, Saltis, Schickling, Fromkes. *Fourth Row:* Drs. Krabill, Chonko, Brubaker, Goodenow, Kronenberg, Knowles, Powers.

DIVISION OF ALLERGY

JAMES TENNENBAUM,
M.D.
Director

Seated: Mrs. Gesundheit, Dr. Tennenbaum, Mrs. Jackson. *Standing:* Mr. Harry Nevus, Drs. Bronstein, Hankison.

DIVISION OF AMBULATORY MEDICINE

RICHARD RUPPERT, M.D.,
Director

Seated: Franny F'na—F'na, Frieda F'na—F'na, Flossie F'na—F'na, Feola F'na—F'na, Funky F'na—F'na, Floozie F'na—F'na. *Standing:* Drs. Larrimer, Ruppert, Delor.

DIVISION OF CARDIOLOGY

RICHARD LEWIS, M.D.,
Acting Director

Seated: Drs. Wayne, Wooley, Fontana, Lewis. *Standing:* Drs. Schal, Robinson, Ryan, Leighton.

DIVISION OF
DERMATOLOGY

EDMUND LOWNEY, M.D.
Director

Seated: Drs. Lowney, Hamilton,
McCreary, Brownlee. *Standing:* Drs.
Capper, Brownstein, Krusinski, Ha-
zel.

DIVISION OF
ENDOCRINOLOGY

THOMAS SKILLMAN,
M.D., Director

Seated: Drs. Bixel, Steffes,
Bunn, Cataland. *Standing:* Drs.
Folk, Bradley, Tzagournis, Rey-
nertson, Malarkey, George.

DIVISION OF
GASTROENTEROLOGY

NORTON GREENBERGER,
M.D.
Director

Seated: John Dust, Anna Sarca, Bil-
lie Rubin, Nurse Durkin. *Standing:*
Drs. Beman, Brooks, Caldwell,
Greenberger, Mekhjian, May, De-
lor.

DIVISION OF HEMATOLOGY

STANLEY P. BALCERZAK,
M.D., Director

Seated: Drs. Wall, Balcerzak, Wil-
son, Bouroncle, Metz. *Standing:*
Drs. Sagone, Flanigan, King, Allen,
Hilberg.

DIVISION OF INFECTIOUS DISEASES

ROBERT PERKINS, M.D.,
Director

L to R: Drs. Saslaw, Fass, Klainer,
Carlisle, Scholand, Hodges, Perkins,
Moheimani.

DIVISION OF NEUROLOGY

J. NORMAN ALLEN, M.D.
Director

L to R: Drs. Millhon, Wiederholt,
Paulson, Wise, Allen, Sherard,
Shuttleworth, Vaughan.

DIVISION OF PULMONARY DISEASES

PHILIP BROMBERG, M.D.
Director

L to R: Drs. Donnerberg, Browning, Tomaszewski, O'Brien, Atwell, Bromberg.

DIVISION OF RENAL DISEASES

THOMAS FERRIS,
M.D., Director

L to R: Drs. Stein, Williams, Ferris, Congbalay, Boonjarearn.

DIVISION OF RHEUMATOLOGY

FRANCIS MCCOY, M.D.,
Director

L to R: Drs. Holtzman, McCoy, Mallory, Melvin.

DEPARTMENT OF SURGERY

ROBERT M. ZOLLINGER,
M.D., Professor and Chairman

First Row: Drs. Furste, Hardymon, Zollinger, Jesseph. *Second Row:* Drs. Nick, Teterick, Keith, Lewis, James. *Third Row:* Drs. Heydinger, Evans, Thomford, Minton, Mattison.

DIVISION OF NEUROSURGERY

WILLIAM HUNT, M.D.,
Director

Seated: Drs. Yashon, Bingham, Meagher, Hunt. *Standing:* Drs. Venes, Abreu, Paul, Banerjee, Kosnick.

DIVISION OF ORTHOPEDIC SURGERY

PAUL CURTISS, JR.,
M.D., Director

Seated: Drs. Lacey, Curtiss, Meyer. *Standing:* Drs. Eyring, Ward, Larrick, Torch, Miller, Roberts.

DIVISION OF PLASTIC SURGERY

RONALD BERGGREN,
M.D., Director

Seated: Drs. Houser, Berggren,
Maxwell. *Standing:* Drs. Mattison,
White.

DIVISION OF THORACIC SURGERY

KARL KLASSEN, M.D.,
Director

Seated: Drs. Meckstroth, Klassen, Cattaneo.
Standing: Drs. Kilman, Vasko, Williams.

DIVISION OF UROLOGY

CHESTER WINTER, M.D.
Director

Seated: Drs. Glusenkamp, Leff,
Winter, Taylor, Sural. *Standing:*
Drs. Chung, Puppel, Smith, Dool-
ittle, Braren.

DEPARTMENT OF
PEDIATRICS

BRUCE D. CRAHAM, M.D.,
Professor and Chairman

L to R: Drs. Klamar, Craham,
Rueger.

DIVISION OF
ADOLESCENT
MEDICINE

THOMAS SHAFFER, M.D.
Director

L to R: Mrs. Bruce, Miss Dawson,
Dr. Pike, Dr. Wilder, Mrs. Camp-
bell, Miss Graul, Dr. Stevenson,
Dr. Sylvester, Dr. Shaffer.

DIVISION OF ALLERGY

CHARLES MILLER, M.D.,
Director

L to R: Drs. Miller, Bullock.

DIVISION OF
CARDIOLOGY

DONALD HOSIER, M.D.,
Director

L to R: Drs. Craenen, Ertel, Hosier.

DIVISION OF
METABOLISM AND
ENDOCRINOLOGY

JUAN SOTOS, M.D.,
Director

L to R: Drs. Sotos, Romshe.

DIVISION OF GENETICS

STELLA KONTRAS,
M.D., Director

*Seated: Drs. Kontras, Sommer.
Standing: Drs. Aplin, Haque.*

DIVISION OF
HANDICAPPED CHILDREN

ANTOINETTE EATON,
M.D., Director

L to R: Drs. Ruppert, Bass, Eaton, Wenar.

DIVISION OF
HEMATOLOGY

WILLIAM NEWTON, M.D.,
Director

L to R: Drs. Kontras, Newton, I. Ertel, Samuels, Tan, Wadhwa.

DIVISION OF
INFECTIOUS DISEASES

HENRY CRAMBLETT, M.D.,
Director

L to R: Drs. Haynes, Hilty, Cramblett.

DIVISION OF NUTRITION

GEORGE OWEN, M.D.
Director

L to R: Dr. Garry, Mrs. Kram, Dr. Lubin.

DIVISION OF
NEUROLOGY

EARL SHERARD, M.D.
Director

DIVISION OF
PSYCHOLOGY

HERBERT RIE, Ph.D.
Director

DIVISION OF
PULMONARY DISEASES

GORDON YOUNG, M.D.
Director

DIVISION OF
SURGERY

H. WILLIAM
KLATWORTHY, JR.,
M.D., Director

*Seated: Dr. Kent. Standing:
Drs. Nahmad, Klatworthy,
Pepper, Boles, Weatherley,
Sirinik.*

DEPARTMENT OF
ANESTHESIOLOGY

WILLIAM HAMELBERG, M.D.
Professor and Chairman

First Row: Drs. Beach, Hohmann, Nusbaum, McCullough, Gauthier. *Second Row:* Drs. Rand, Prince, Hamelberg, Anderson, Garvin, Curtis. *Third Row:* Drs. Burchfield, Martin, Best, Brown, Stone.

DEPARTMENT OF CLINICAL
PATHOLOGY

COLIN MacPHERSON, M.D.
Professor and Chairman

Seated: Drs. Gruemer, Ayres. *Standing:* Drs. Grannis, MacPherson, Lott, Stevenson.

DEPARTMENT OF
OBSTETRICS AND
GYNECOLOGY

WILLIAM COPELAND, M.D.
Professor and Acting
Chairman

First Row: Drs. Villalon, Samuels, Isabelle, Donley, Essig, Feteris. *Second Row:* Drs. Ruppersberg, Rigsby, DeVoe, Hapke, Neal, Hollenbeck, Holapfel, Williams.

DEPARTMENT OF
OPHTHALMOLOGY

TORRENCE MAKLEY, M.D.,
Professor and Chairman

Seated: Drs. Simmons, Thompson, O'Dair, Andrew, Farber. *Standing:* Drs. Joseph, Keates, Battles, Olson, de la Motte, Biersdorf, Lewis, Mr. Bitone.

DEPARTMENT OF
OTOLARYNGOLOGY

WILLIAM H. SAUNDERS, M.D.,
Professor and Chairman

First Row: Dr. Stockwell, Miss Paul, Drs. Smith, Saunders, Arthur, Ray, Nilo. *Second Row:* Drs. Miglets, Jordan, Robertson, Letson, Birck. *Third Row:* Drs. Ericson, Gebhart, Melnick, Lim, Main, Bolz, Lowery, Mechenbier, Schuller. *Fourth Row:* Dr. VerMeulen.

DEPARTMENT OF PHYSICAL
MEDICINE

ERNEST JOHNSON, M.D.,
Professor and Chairman

Seated: Miss Howard, Mrs. Maxfactor, Mr. Maxwell. *Standing:* Drs. McLean, Burkhart, Checkles, Utz, Spiegel, Guyton, Johnson.

DEPARTMENT OF
PREVENTIVE MEDICINE

HAROLD V. ELLINGSON,
M.D., Professor and Chairman

Seated: Mrs. Weir, Drs. Petersen, Keller, Ellingson, Billings, Lanese, Hamdi. *Standing:* Drs. Giraldo, Bashe, Heggen, Bason, Campbell, Weir, Anthony, Banks, Mr. Chase, Dr. Chirikos.

DEPARTMENT OF
PSYCHIATRY

IAN GREGORY, M.D.
Professor and Chairman

Seated: Drs. Schmidt, Gregory, Kaelbling. *Standing:* Drs. Stinson, Learmonth, Green, Smith, Leaverton, Gwynne, Arnold, Knopp.

DIVISION OF CHILD
PSYCHIATRY

R. DEAN CODDINGTON,
M.D., Director

L to R: Dr. Rowe, Miss Luidens, Dr. Arnold, Mrs. McIntyre, Mrs. Hochem, Dr. Coddington.

DEPARTMENT OF
RADIOLOGY

SIDNEY W. NELSON, M.D.,
Professor and Chairman

Seated: Drs. Batley, Nelson, Gold-
stein. *Standing:* Dr. Sopp, Mr.
Dare, Mr. Noname, Mr. Cousins,
Drs. Koh, Morris, Rothe, Probst,
Chino, Siwik, Klosterman, Savo-
laine, Fulmer, Yu.

DIVISION OF
RADIATION THERAPY

FRANK BATLEY, M.D.,
Director

Seated: Drs. Murthy, Probst, Batley.
Standing: Drs. Parillo, Ehlers, Bala-
chandra, Kartha, Koh, Batley.

Medicine IV

MAN OF THE YEAR

Thomas G. Skillman, M.D.

Citation: The Class of 1972 takes great pride in presenting the Man of the Year Award to Dr. Thomas Skillman, Professor and Director of the Division of Endocrinology and Metabolism.

Dr. Skillman has fully demonstrated a complete dedication to medicine and medical education ever since we were first introduced to him in our Physical Diagnosis course in the sophomore year. His clinical excellence, sense of humor, humility, willingness to help, ability to teach, and devotion to his patients have been increasingly evident to us as we progressed through our clinical years. He considers a teaching hospital akin to a scholar's library, where each patient represents a volume from which the physician learns, and more importantly, treats, with the utmost care. He is considered by his peers to be a "true physician" in the sense that he has, first, been trained to be an excellent clinical physician; second, he knows the value of research; and third, he has developed a deep commitment to the training of the new physicians.

Dr. Skillman is a gentleman in the truest sense of the word: he is genuinely courteous, guards against introducing any topics which may irritate or wound, is never wearisome in conversation, makes light of favors which he confers, and is indeed kind in all his actions.

In respect and admiration, we take great pleasure in making Dr. Skillman an honorary member of the Class of 1972.

Navy Midshipman Skillman, on leave, 1945.

With a student — more often than not.

Number 76 for Walnut Hills High, 1942.

The B-W linebacker, 1944.

Young parents, with firstborn Linda, 1951.

Professor and Chief of Endocrinology,
Creighton University,
Omaha, Nebraska, 1965.

Born January 7, 1925, and raised in Cincinnati, Ohio, Tom Skillman was the only child of a local businessman. A sports buff even as a young man, he played football for Walnut Hills High School, graduating in 1943. That fall, he entered Baldwin-Wallace College in Berea, Ohio, majoring in biology and minoring in chemistry.

Because it was wartime, Tom was involved in the Navy's accelerated program. After spending less than 24 months as an undergraduate, and playing line-backer for B-W, the husky athlete entered the University of Cincinnati College of Medicine in 1945. The following summer he picked up his remaining undergraduate credits, and received his B.S. in 1946.

While in medical school, he was an outstanding student, heading his class his senior year and graduating sixth overall in a class of 68. But not all was study. Tom was also a Phi Chi, and during his sophomore year at a fraternity party, he met Elizabeth (Liz) McClellan, a senior nursing student at Christ Hospital. They were married just before he began his junior year.

After graduation came a rotating internship at Cincinnati General Hospital, then two years in the Navy. Returning to Cincinnati in 1952, Tom served a medical residency, then a fellowship in metabolism. Newly Board-certified in 1957, he became an Assistant Professor of Medicine at Ohio State. He left this position in 1961 for an Associate Professorship in Medicine at Creighton University in Omaha, Nebraska, where he was named Professor and Chief of Endocrinology in 1964.

Presently Professor and Director of the Division of Endocrinology at Ohio State, a position he has held since 1967, Dr. Skillman is a member of many professional organizations. These include the American Federation and Central Society for Clinical Research, Alpha Omega Alpha, the Ohio Diabetes Association, and the American Diabetes Association.

Tom has other interests besides medicine. Described by his wife as a "strong family man and an adorable husband," he has two daughters: Linda, a 20-year-old O.S.U. senior, and 18-year-old Barbara, a senior at Upper Arlington High School.

An avid sports fan, Dr. Skillman also is an active golfer and plays with daughter Barb when he isn't with his usual foursome of Drs. Jack Geer, Bob Wall, and Sam Saslaw. Dr. Skillman also plays one-on-one basketball with his daughters and their friends at their backyard hoop.

Above all, though, to all who know him, Tom Skillman is admired as an excellent physician and a deeply involved teacher. He is the epitome of a "real physician," for he is a good practicing physician, is actively involved in both clinical and laboratory research, and has formed a true commitment to the teaching of new physicians.

It is for just these qualities that Dr. Thomas Grant Skillman has been chosen by the Class of 1972 as Man of the Year and Honorary Class Member.

Medical school graduation, 1949.

Wife Liz.

Ralph E. Haynes, M.D.
Associate Professor of Pediatrics

"The teacher of medicine starts with highly selected students who have survived the rigors of pre-medicine and the competition for admission to medical school. The challenge for the preceptor is to stimulate his students, by whatever means, to utilize their abundant talents to the fullest. The reward is the satisfaction and pleasure of contributing, even in some small way, to the training of a physician — dedicated, resourceful, skillful, and compassionate."

Victor R. VerMeulen, M.D.
Assistant Professor of Otolaryngology

"My ideas about learning and teaching are derived mostly from personal experiences as a student. I learned best when the material presented made sense. I retained information longest when embarrassed a bit by a question I couldn't answer. Praise has always been a better spur than criticism. A pleasant circumstance made clear thinking easier than a situation heavy with anxiety. No doubt each of us learns best when the carrot is offered or the goad applied in different proportions. What worked best for me is the basis of my method of trying to educate others."

Albert S. Klainer, M.D.
Associate Professor of Medicine

"As time and society attempt to alter medical education, so, too, will student and teacher need to change. But we who teach and those who learn must be wary that we do not change for change alone and that we do not give up the old that is good for the new because it is new. A medical school's greatness lies in the students and teachers who come together to enjoy the mutual privilege of learning; all the rest is simply a shell for us to inhabit. Medical education is unique because student and teacher meet on equal grounds to learn from each other, to teach each other, and in so doing to cure the ill and conquer disease. Let us hope that progress does not cause us to lose sight of this."

*Jack C. Geer, M.D.
Professor and Chairman of Pathology*

"Teachers are recognized by society as those persons who plan and deliver formal education which is a directed, concentrated experience that imparts awareness, partial understanding, and acceptance of the realities of this life. This recognition is far too narrow in scope, as persons in all walks of life are to some degree teachers in that they influence the thinking of others. The success of all teachers is dependent upon their ability to divest themselves of selfish interests and clearly demonstrate that they sincerely care for others. The reward to the teacher is quite simple, but is by far the most gratifying experience of which I am aware; the sparkle in the eye that silently says thank you."

*Charles A. Bush, M.D.
Clinical Instructor of Medicine*

"Medical education is a continuous learning process beginning on the first day of medical school and ending only at the termination of the physician's career. We are all students of medicine and we are all teachers of medicine. The teacher of medicine is one who is able to ask the question, "Why?" and this in turn makes him a student of medicine. The student of medicine is one who has an organized approach in attempting to answer that question and when exercising that approach he becomes the teacher of medicine. Everyone, then, in medicine is a peer; the teacher becomes student, the student becomes teacher, and the relationship is mutually profitable. In this way my relationship to medicine and my peer group of medical students and faculty alike becomes most exciting, challenging, and totally enjoyable.

The Class of 1972, with the approval of the Deans, has decided to recognize more than the one person traditionally honored for his outstanding contributions to education in the College of Medicine. We feel that there are so many fine people among the medical faculty that their recognition in this minor way is but a small recompense for what they have given to us. We in no way are trying to establish a precedent for future classes to follow, but are striving for a distinctive and meaningful graduation. Therefore, besides the annual Man of the Year award, we are also honoring three physicians from the clinical sciences, one from the basic sciences, and our popular chief medical resident of 1970-1971. We sincerely hope that future classes will be able to benefit as handsomely as we have from these truly extraordinary people.

Teaching Awards

'The Match'

... April 14, 1972

The Senior Dinner-Dance was held May 19, 1972, at the Imperial House North. State Senator Tennyson Guyer was the speaker. The Man-of-the-Year and Teaching Awards were announced at this time, also.

Senior Dinner Dance

Doctoral Convocation

The Doctoral Convocation of the College of Medicine was held at 4:00 P.M. in Mershon Auditorium on June 8, 1972. Senior honors were announced, the Man of the Year portrait was presented to the College, Teaching Awards were given, and, at last, each graduate was awarded his long-awaited, much-deserved, green doctoral hood, signifying his degree: Doctor of Medicine.

. . . and, finally,

Graduation!!! June 9, 1972

In the beginning . . .

. . and now

Sir Morry Rotenberg

"Of course I'm right, you idiot — am I ever wrong?"

The legendary Wednesday night poker game

"Actually, for me medicine is an avocation only — in truth, I am a garage mechanic."

Marcus Ironside, M.D.

". . wonder if the twins are here yet?"

I'm cuter than Doctor
Steven Kiley *any* day!!

God, am I glad to be leaving
this hole for another day!

Let's see — how do you
change the channel on
this thing — I don't want
to miss *General Hospital*.

Kitchy, kitchy, kitchy!!

This is a hell of a lot more interesting than the New England Journal.

"5 metamyelocytes,
4 atypical lymphs,
3 sickled red cells,
2 giant platelets,
and a partridge in
a pear tree."

Do these two *really*
represent the next
generation of American
medicine?

YAWN!!!

"Wa-a-a-al, if you've seen one chest film, you've seen 'em all."

THE PHANTOM

This is an awfully funny place for a vibrator to get stuck!

I am about to transform this sweat inducer into a bomb powerful enough to demolish this entire building — including '3C'.

I AM your President — make no mistake about that!!!

Stick with me, girls — I can make you all, stars.

NO WAY am I gonna pose doing some dumb stunt for you idiots!!

Does she have a friend? And can they play handball?

Oh, God — here comes crazy Linda and her damned camera again!!!

It's a Hurthle cell adenoma, Connie!!

So I like older women — so what?

Gee, I wonder if anybody will miss me.

... and I claim this ocean in the name of Dean Prior for Ohio State University.

I don't care if you are a girl . . . if you make any cracks about "April's Fool," I'll belt you right in the mouth.

At the risk of being murdered by the floor dietician, I think I'll partake of a little liquid refreshment.

I think this kid's not too healthy -- no heartbeat!

... and after you write on the yellow sheets, the ward clerk throws them away.

Modesty forbids any comment.

I hate medical students who smirk at my mistakes!

Phase III, Phase IV, and Medicine III

"Gotta go — rounds start at 7:30."

First stop — the admission book — for the "good news."

The Wonderful World
of Roundsmanship

"What are all these little things with tails?"

"To be given IV by M III . . ."

The individual attention of
one-to-one teaching.

"Sure wish I had a green badge!!!"

PLAYING DOLLY

"I sit up all night, and what do I get out
of it? — a shoe full of blood, that's what!"

"Admit to 10 west
Diagnosis: Gomer of Gomers
Condition: just barely compatible with life"

Medicine III

Routine admission chest film.

"That was the third case of GC I've seen this week!"

"... and then Dr. Vasko said to culture his gorblatz and treat him for krebnitz."

"If you do this *right*, it looks just like a little bee sting."

"Three years of medical school for THIS??"

"... and I ran it back for 80 yards."

"I don't know what this guy has — but it sure looks like DISEASE!"

"And when all else fails, just give 'em a good old sternal thump."

"Now, we're just going to take a little bit of blood for some tests."

"Good luck — she has veins like tissue paper and skin like an elephant."

Phase IV

Gee, medical school sure is fun and easy!!!

It's never too early to consider internship.

"So I can't look glamorous at 8:00 A.M. — so what?"

"Somebody just self-destructed in there."

"If I hide up here long enough, maybe the lecturer will start without me."

You have just had neuroanatomy in one simple, three-hour course — any questions?

I hear the new library will be done soon — in time for our graduation.

OFFICERS: Vice-President Tom Reynolds, President Mark Diamond, Secretary Kathy Driver, Treasurer Ira Shafran.

Phase III

"Listen, it says right here in the Whole Earth Catalog — mushrooms cause cancer."

"Okay, you guys — who used the last of the vodka?"

I hope these young punks appreciate this fantastic library!!

Oh, there's no place like home — or the Pilot School.

"Some days I wish I could be back with the computers, and to heck with all this 'patient care' stuff."

Pilot School

Activities

Pi Chapter
466 King Avenue

OFFICERS: President Ralph Colla, Vice-President Ed Partyka, Secretary Gary Hurst, Treasurer Joe Sayed.

Challenge is sought, Desire is ever-present, Success is inevitable — These are the men of Alpha Kappa Kappa. Whether it be in the classroom, at the bedside, on the athletic field, or between the sheets, the AKK's achievements mark him as the man of distinction.

As Pi Chapter passes its seventieth year, we look upon the glories of times past as a mirror for the future. The challenge of Medicine and the challenge of Life will be met in Brotherhood.

Connie Doyle relaxes at the game table.

Duane Roe and companion soaking up the ultraviolet.

The Brothers of Pi Chapter

Alpha Kappa Kappa

Beta Tau Chapter
1454 Neil Avenue

1971-72 OFFICERS: President Gary B. Williams, Vice-President John N. Aseff, Secretary Joseph J. Mravec, Treasurer Lee R. Davis, Asst. Treasurer James K. O'Donnell, Historian Marvin D. Shie, House Manager Richard J. Kempert, Steward Sanford R. Kimmel.

Nu Sigma Nu was the oldest of American medical fraternities, originating in 1882 with the establishment of Alpha Chapter at the University of Michigan. At its zenith Nu Sigma Nu extended to 47 medical schools throughout the United States and Canada. In 1970, with 18 remaining chapters, the national fraternity was dissolved and all its assets were placed in trust.

At that time Beta Tau Chapter of Nu Sigma Nu at the Ohio State University College of Medicine opted to continue as a local unit using the name of Nu Sigma Nu. With over 80 active members and outstanding local alumni support it was decided to continue in hopes of reorganizing the national fraternity at some future date.

Presently, Nu Sigma Nu at Ohio State has over 60 members representing both the old and new curricula. An active educational, social, and intramural athletic program is maintained. These features include a CPC with prominent members of the faculty at our monthly meetings, our infamous Senior Banquet, and full participation in intramurals. The highlight of the past year was a banquet in honor of Rosa Kendrick, our cook and housekeeper for the past 40 years. We, the members of Nu Sigma Nu, are proud of our fraternity and hope that our existence has been, and will continue to be a credit to the Ohio State University College of Medicine.

Honoring Rosa.

Mike Hunt and Friend — with phallus.

Hey, you guys — come here and look at what's going on next door!!!

Nu Sigma Nu

Left to right: Vice-President Gary Roselle, President Stephen Weiss, Secretary-Treasurer Michael Roth, and Membership Chairman Marvin Chasen.

The Chi Chapter of Phi Delta Epsilon Medical Fraternity prides itself on an annual program which incorporates both social and academic events.

This year has been an extremely active one, as the fraternity has sponsored a wide range of social events. These festivities include stags, brunches, a theater-dinner party, a pot-luck dinner, luau at the Kahiki, and an evening at Scioto Downs.

The academic program is highlighted annually by the fraternity-sponsored Aaron Brown-Robert Watman Memorial Lecture. This year we were privileged to have as our speaker Dr. Oscar D. Ratnoff, acting Chairman of the Department of Medicine at Case-Western Reserve University.

Stan and Judy Cohen, Bob and Rhona Jacobson, and Morry and Marcy Rotenberg.

Phi Delta Epsilon

The Phi Chi House, 1470 Neil Avenue.

View from the roof on a Friday afternoon.

The existence of Phi Chi fraternity at Ohio State proves that the pursuit of hedonistic delights and getting a good medical education are not mutually exclusive events. The Phi House is a nidus of activity for some sixty medical students who believe in having a good time, and are not inhibited about doing exactly that. The existence of such a philosophy in an increasingly suppressive atmosphere is a paradox. Perhaps it provides a necessary outlet for some of the basic desires even medical students find impossible to deny. Despite malicious gossip of orgies and black rituals, happenings in the bowels of the Phi House are surprisingly physiologic, simply divested of cumbersome convention. Recent community activities include selling poppies for NASA, volunteer research for Masters and Johnson, and semi-anonymous aid for unwed mothers in the school of nursing.

OFFICERS, 1971-72:

President
Joel Keats

Social Chairman
Mike Rekart

Vice-President
Jim Gibfried

Treasurer
Greg Laurell

P. J. wine party.

Homecoming festivities, highlighted by the legendary, (and now defunct) tree.

Reading the Sunday papers is a ritual.

baptize thee in the name of Dean Meiling, and Dean
ior, and Dean Williams.

A day on the roof.

Phi Chi

Student Council

Dr. Prior and Student Council President Charles A. Gerace, Jr.

The Student Council of the Ohio State University College of Medicine functions as an organized sounding board to afford the students a voice in the affairs of the College of Medicine. The council is composed of elected representatives from each class, and the Presidents of each medical class.

Functions of the Student Council include the enforcement of the honor code, the supervision of student elections, administration of tours to prospective College of Medicine Students, and the fostering of better faculty-student relationships via the organization of faculty firesides, when medical students and their teachers can meet on a social level to discuss various topics of interest, both medical and non-medical in nature.

Alpha Omega Alpha

OFFICERS, 1971-72: President, Joel Lichtenstein; Vice-President, Robert Clark; Treasurer, Tom Oates; Secretary, Dennis Karsh.

Alpha Omega Alpha Medical Honor Society was organized in 1902 to foster student honesty and help promote higher medical ideals of scholastic achievement. Ohio Gamma Chapter was established on this campus in 1932. The constitution specifies that election of members be based primarily on their academic achievements, but not at the expense of integrity, curiosity, personal habits and conduct, as well as the esteem with which they are held by their colleagues and teachers.

MEMBERS FROM THE CLASS OF 1972:

Robert A. Albus

Landacre Society

Vice-President Dennis Karsh, Advisor Dr. Jay H. Stein, and Treasurer James Kazura on Landacre Day.

The Landacre Society was founded in 1956, in memory of Dr. Francis Leroy Landacre, Chairman of the Department of Anatomy from 1914 to 1933. The purpose of the society is to bring together those students who have demonstrated outstanding ability in scholarship and research activities, and to allow them the opportunity to present the fruits of their research.

This year the annual Landacre Day Symposium was held on April 6, 1972. Portions of the program were presented during Medical Grand Rounds.

OFFICERS FOR 1971-1972 WERE: President, Alan Hatfield; Vice-President, Dennis Karsh; Secretary, James Rector; and Treasurer, James Kazura.

Members from the Class of 1972:

Thomas M. Bashore
H. Peter DeGreen
Alan K. Hatfield
John B. Krupko

Edward W. P. Smith
William B. Zipf

American Medical Women's Association

1971-72 OFFICERS: Debbie Franley, Treasurer; Becky Stafford, President; Nancy Trhlik, Vice-President; Linda Parenti, Secretary.

The Junior Branch of the American Medical Women's Association at Ohio State was established in 1962. Since there is no sorority for female medical students, this organization serves as a meeting ground for the "hen medics" and is open to all women in the College of Medicine.

There is an active affiliation with the Columbus A.M.W.A., and often many of the senior members serve as hostesses for teas and parties for the students. This past year, a Columbus physician, Dr. Frances Keller Harding, served as national president of A.M.W.A.

A primary function of A.M.W.A. is the orientation of incoming freshman women at a welcoming tea. The 1971 edition of this affair was somewhat crowded by the 39 incoming femedics who swelled the ranks of the chapter to 60-plus. The highlight of the year was the spring picnic held at Dr. Connie Doyle's home in May.

S.A.M.A.

Left to right: Roger Baker, treasurer, Russel Kaufman, president, Barney King, secretary, David Wiedemar, vice-president.

The Ohio State University chapter of the Student American Medical Association is open to all students of the College of Medicine. Membership in S.A.M.A. entitles students to a subscription to "The New Physician" magazine, the use of the economical and convenient white coat laundry, noon movies, and black bag and health insurance.

Doug Dewar, Pilot School, white coat laundry.

WA.S.A.M.A.

Left to right: Jeri Cowan, treasurer, Judy Cebul, recording secretary, Phyllis Hunter, vice president for interest groups, Sheryl Thomasson, vice president for newsletter, Henny Johnson, President, and Mary Smeltzer, vice president for programs.

WA-SAMA (the Women's Auxiliary to the Student American Medical Association) was organized to provide an opportunity for all medical student's wives to meet and know one another, and to help each other adjust to and understand her role as a medical student's wife.

WA-SAMA provides many activities, such as bridge, handicrafts, needlecrafts, and medical topics. Our monthly program meetings are varied; for example, speakers may include doctors, lawyers, representatives from the electric or gas companies, food specialists, and representatives from florists. The organization is also geared for as much public service as needed. Last, but not least, WA-SAMA has a social event at the end of the year which includes all medical students and friends.

Nite Out . . .

Nite Out, a Medical Center Tradition, is a variety show whose production is carried out by students from the Colleges of Medicine and Dentistry, including the Schools of Nursing and Allied Medical Professions.

First performed in 1951, the show was given on various stages on campus until 1957, when it was performed at Mershon Auditorium, where it has been presented ever since.

Each year a theme is adopted by the Nite Out Council. President Mike Tomcik and his 1972 group chose "Nite Out Tickles Your Fancy."

The profits from the annual show go into the "Nite Out Student Loan Fund," and are available to Medical Center Students.

Tickles Your Fancy!!!

School of Nursing

School of Nursing

The heritage of the School of Nursing of the Ohio State University can be traced to the establishment of the Homeopathic Training School founded in 1914. The first class of four members was graduated in 1917. The first Nurses Home was located on Neil Avenue, and accommodated fourteen students. As the nursing students increased in number, a second home was established on West Eleventh Avenue, along with utilization of Oxley and South Halls on the Ohio State University campus.

The Class of 1923 was the first to graduate with other students of the Ohio State University, and the School was organized under its present name in 1929. In 1931 a five-year program was organized, so that graduates could receive a Bachelor of Science in Education. A three-year program began in 1938, and the present four-year program was started in 1942. Since 1942, all instruction offered at the undergraduate level has led to the degree of Bachelor of Science in Nursing.

Professional nursing is a service dedicated to promoting health, preventing illness, and caring for the sick in a variety of settings. In performing this service, the nurse works with physicians and allied medical personnel in carrying out an overall plan of care. Professional nursing calls for competent action based on sound information and critical thinking. Planning an individual's nursing care, putting it into effect, and evaluating it requires the consistent application of knowledge from the physical, biological, and social sciences, and from the humanities.

Faculty

Dear Graduates of 1972:

The year of your graduation will be a memorable one for you as it marks the achievement of one of your goals. It is a time for reflection about the past and for the establishment of goals to be reached in your future. My message to you has been written by someone else; however, it is fitting for you to give some thought to the message as you move into another world — the real world of delivering health care to people.

God grant me the Serenity

to accept the things

I cannot change,

Courage to change the

things I can and

Wisdom to know the difference.

Best wishes for success in your personal and professional life.

Sincerely,

Imogene M. King, R.N.

Dr. Sills admires her Distinguished Teaching Award.

In recognition of faculty excellence in teaching, the College of Medicine presented its first Annual Teaching Awards on November 2, 1971. Dr. Grayce McVeigh Sills, Associate Professor and Chairman of the Graduate Education Committee, was the recipient of this award for the School of Nursing.

The awards, consisting of a scroll and a \$100 gift, were granted to the recipients, who were nominated by the Faculty Honors and Awards Committee. The final winners were chosen from names solicited from the entire student body and faculty of the College of Medicine, School of Nursing, and School of Allied Medical Professions.

Nursing II and III

Activities

Nursing Student Council

Left to right: Vice-President for Communications Bernie Revta; President Elveta Simpkins, R.N.; Vice-President for Finance Diane Stuckey; Vice-President for Student Affairs Dick Boder; Advisor Mrs. Kitty Kisker.

The Nursing Student Council evolved in 1970 from the Student-Faculty Government Association. It parallels other college councils with representation in the Intercollege Council and the Council of Governments. Nursing Student Council differs from its predecessor in that it is a student, not student-faculty, organization.

Its purposes are to promote cohesion of the student body; to insure communication among these students, the faculty, the administration, and the alumni; to insure communication with the campus community; to provide publicity for the organization; to assist with recruitment and orientation of nursing students; to recognize nursing students for achievements in nursing and in the campus community; to organize and publicize social, service, and educational opportunities pertinent to nursing students; and to participate in the determination and enforcement of regulations concerning students. In March, 1970 the constitution was ratified and the first elected officers were installed.

Torch Club

OFFICERS: President, Denise Dominique; Vice-President, Patrice Rancour; Secretary, Nancy Plesser; Treasurer, Chris Bayless.

The Torch Club aims to improve all phases of nursing students' relationships within the school, to encourage higher scholastic status and interest among nursing students, and to provide specific service to the Ohio State University Hospitals. Membership is open to juniors, seniors, and registered nurses studying for their bachelor of science degree. A 2.75 accumulative average and active participation in Medical Center and campus activities are also required.

Sigma Theta Tau

OFFICERS, 1971-72: President, Christie Berner; Vice-President, Bonnie Lyle; Recording Secretary, Cathy Fry; Membership Secretary, Mary Jane Schwartz; Treasurer, Sara Mercer; Archivist, Shirley Smith; Advisor, Gwen Bellam.

Sigma Theta Tau is the only national honor society of nursing. Constituent chapters are established in collegiate schools of nursing accredited by the national accrediting body recognized by the profession. Sigma Theta Tau is professional rather than social.

The purposes of Sigma Theta Tau are to:

1. recognize the achievement of scholarship of superior quality;
2. recognize the development of leadership qualities;
3. foster high professional standards;
4. encourage and support research and other creative work in nursing;
5. strengthen commitment on the part of individuals to the ideals and purposes of the profession of nursing.

New inductees into Epsilon Chapter at spring induction.

Alpha Tau Delta

OFFICERS: President, Evelyn West; Vice-President, Paula Riesenber; Recording Secretary, Sue Feldscher; Corresponding Secretary, Vicki Buerger; Treasurer Karen Maddex; Custodian, Nancy Trimble; Historian, Dee Wharton; Editor, Carol Myers; Pledge Marshals, Sara Mercer and Nancy Emery.

Spirited conversation at a "brown bag" potluck dinner-meeting.

Alpha Tau Delta had a successful rush season, pledging 29 new members. The year has been filled with TGIF's, service projects, and education programs. The most significant contributions this year have been organizing an Organization Day at the School of Nursing to explain all the student organizations, helping support and promote Creative Living and the Senior Challenge, and having open seminars on "The Law and the Nurse's Responsibilities," "Epilepsy," and "Self-Protection."

Two social service projects were a Christmas party for the Hannah—Neil orphans, held with Delta Sigma Delta, and a picnic for Dodd Hall patients at Blacklick Woods with Nu Sigma Nu.

*School of Allied
Medical Professions*

School of Allied Medical Professions

It was in the early 1960's that the concept of a unified school under the auspices of the University, for the preparation of professionals in para-medical and allied medical fields, was first germinated. However, it was not until July 1, 1966 that the School of Allied Medical Professions officially came into being.

Two major factors affected the decision to establish such a school. First was the previous existence of health profession related programs administered by various schools and colleges. Second was the utilization of common or "core" curricula. It was determined that, both because of the common goals of these programs; namely, the expansion and improvement of health care, and the fact that the pre-professional phase of these programs is a core of basic education in the humanities, social and natural sciences, there were advantages to the combining of them under the administration of one School. Combination of teaching and administration, and the facilitation of transfer from one program to another with the minimum of lost credit, were the two major factors involved.

The original programs included Physical Therapy, Medical Technology, Medical Illustration, Occupational Therapy, Medical Dietetics, and Nurse Anesthesia. These have been supplemented recently by programs in Circulation Technology, Medical Communications, Medical Records Administration, and Radiologic Technology, and a master's program in Hospital and Health Administration.

A major step forward was the opening during the past academic year of the new School of Allied Medical Professions building, wherein are housed the offices and faculties of all twelve divisions, another step forward in the growth and development of our expanding allied health professions.

Dear Graduates of 1972:

The School of Allied Medical Professions was established in recognition of an increasingly critical need for trained personnel in an ever expanding variety of professional health fields. We believe that young men and women like you provide the key to the highest standards of health services. As you begin the application of your skills in meeting the nation's health needs, we will take pride in your accomplishments and are confident that you are embarking upon a career offering a lifetime of challenge and personal satisfaction.

We are happy that before the completion of your curriculum you have been able to share with us the excitement and satisfaction of moving into the new School of Allied Medical Professions Building. It is hoped that as a part of our growing family of alumni, you will keep in touch with us and will visit us whenever possible.

The faculty and staff join with me in congratulating you on the achievement of your professional and academic goals and in wishing for you the ultimate in personal satisfaction.

Cordially,

Robert J. Atwell, M.D.
Director

Medical Dietetics is a program within the School of Allied Medical Professions in which men and women are professionally educated in the science of nutrition and the practice of providing nutritional care for all people.

The theory and clinical components of medical dietetic education are presented concurrently to students in a medical setting.

The graduate in medical dietetics is committed to maintaining or improving the nutrition of persons placed in his care. He does this by conferring with the individual and his family, the physician and other members of the health care team.

If employed in a hospital or clinic, he interprets pertinent information from the patient's medical records and applies this information, together with his knowledge and experience, in planning diets according to the person's nutritional needs, social status, economic status, and personal preferences.

Back Row, left to right: Adrienne Harris, Debbie Waidner, Robert Heisler, Connie Brantley, Robert McLaughlin.*

Class of 1972

It is the goal of the medical dietitian to assist people in reaching optimum nutritional status, whether he is working with children or adults, with the sick in hospitals, or with families in the community.

The four year baccalaureate program in Medical Dietetics was piloted at The Ohio State University and graduated its first class in 1964. It became a division of the School of Allied Medical Professions at the School's inception in 1966.

The Medical Illustration program at The Ohio State University was initiated in 1948 and became a division of the School of Allied Medical Professions when the School was established in 1966.

Students in Medical Illustration specialize in related art and science courses including anatomy and engineering graphics. They are trained to execute surgical, anatomical, and pathological illustrations in a wide range of media. Medical photography is a part of the curriculum as in the execution of charts, graphs, and medical exhibits.

The medical illustrator, as an important member of the health team, works with physicians, research scientists, educators, authors, and many others to record visually the rapidly expanding body of knowledge resulting from modern medical progress.

Rich clinical experience is available to students as the Medical Illustration department provides teaching aids, illustrations for publications, and many other materials for the entire medical complex.

Adah Ruth Sutton, M.S.
*Associate Professor and
Assistant Director*

When the School of Allied Medical Professions was established in 1966, the Medical Technology curriculum was moved from the College of Arts and Sciences to the new school.

In this curriculum, students are trained to perform the laboratory tests on which physicians rely for help in diagnosing and treating disease. They perform the clinical testing of body tissues and fluids, identification of bacteria and parasites, as well as blood cell counting and blood typing.

At the Ohio State University, the student completes basic requirements in the social sciences, humanities, mathematics, chemistry, and biology, before he is admitted to the Medical Technology division at the beginning of his junior year. In the first year of his professional program he completes more advanced science courses and begins the medical technology courses which are oriented toward the patient and the diagnostic laboratory. Most of the senior year is spent in a specially equipped laboratory in the Allied Medical Professions building learning theory, techniques of testing, and application of the tests which are performed in the modern medical laboratory.

The goals of the Medical Technology division are to give the student an opportunity for as wide a cultural background as possible while providing a solid basic science foundation for the clinical professional courses. In the pathology and medical technology courses, the emphasis is on theory and broad concepts will allow the graduate to keep pace with the rapidly developing field of laboratory medicine.

Occupational Therapy

H. Kay Grant, O.T.R., M.S.
Director and Instructor

Left to right: Kay Buckey White, M.S., O.T.R., Janet Johnson, M.S., O.T.R., Margaret J. Adamson, M.A., O.T.R., H. Kay Grant, M.S., O.T.R.

The Occupational Therapy curriculum at The Ohio State University is administratively located within the School of Allied Medical Professions in the College of Medicine.

A student is admitted to the program at the beginning of the sophomore year. The curriculum is arranged in three distinct levels, each requiring approximately a year's study. The first level consists of basic professional courses, advanced science courses, and therapeutic activities. At the second level, human anatomy, applied kinesiology, medical information, psychology, and evaluation and treatment procedures in Occupational Therapy are included. The final level offers additional professional courses along with full time clinical affiliations.

The concurrent integration of academic and clinical learning is possible because the curriculum is established in the medical center complex. In this setting and in affiliated community hospitals, clinical services in Occupational Therapy are available for planned learning experiences.

The occupational therapist is concerned with helping patients regain optimal development of physical and emotional abilities. To accomplish these goals, the therapist uses creative, educational, industrial, manual, musical, prevocational, and recreational activities. The occupational therapist works with patients individually and in groups, both young and old. He is trained to build with the patient a cooperative relationship in which both strive to help the patient achieve his highest potential.

Plans: O.T. in rehabilitation for physically disabled.

Physical Therapy

Gladys G. Woods, M.A., M.S.
*Director and
Associate Director*

Left to right: Sharon Tarquinio, Marian Chase, Ann Downer, Frank Pierson, John Starks, Gladys Woods, Judith Smith, Lynn Holland, Carolyn Kisner, Donald Tootle, John Chidley.

The Physical Therapy program was initiated at The Ohio State University in 1955 and became a division within the School of Allied Medical Professions in 1966. The curriculum is a health-related educational and training program designed to give the student a well-rounded general education as well as the basic courses in both biological and physical sciences related to the specific professional work.

Physical therapy is a health profession for men and women who are interested in working with people. The physical therapist interacts with individuals of all ages and performs professional activities to alleviate pain; prevent, correct or minimize deformity; and to improve the general health of patients.

Development of patient care skills is based upon a knowledge in biology, physiology, psychology, chemistry, physics, and anatomy correlated with physical therapy techniques and medical information. Employment possibilities are varied and include: general hospitals, pediatric treatment centers, school systems, physicians' offices, rehabilitation centers, and extended care facilities.

A career in physical therapy provides professional status and economic security comparable to other health professions and provides many personally rewarding experiences in patient service.

DOCTOR

LAWYER

PHOTOGRAPHER*

When you think about it, the family photographer falls somewhere in the family doctor-lawyer classification. The photographer, like the doctor and lawyer, is called upon when major events in your life occur.

With a fine studio portrait you can relive in later years the happiness of the engagement, the wedding, the arrival of children. A photograph is part of forever, and our studio takes this responsibility seriously.

We are proud to be the photographer chosen to photograph your graduating class.
We hope that this is the beginning of a lifelong relationship.

Thank you,

Your Official Photographer, REMBRANDT STUDIO

RESEARCH/SERVICES QUALITY PRODUCTS

Long a leader in providing high-quality products for the care of infants and children, Ross Laboratories takes pride in its continuing support of research and specialized services in pediatrics.

ROSS CONFERENCES ON PEDIATRIC RESEARCH

Extending over two decades and exploring a wide range of subjects—from the First Conference, on *Megaloblastic Anemia*, through the Sixty-Second Conference, on *Iron Nutrition in Infancy*—these conferences have provided important contributions to knowledge and stimulation of research.

ROSS TIMESAVER NEWSLETTERS

These serial publications provide timely information to doctors, nurses, public health and hospital administrators. *Pediatric Currents*, *Feelings*, *Pediatric World*, *Pediatric Nursing Currents*, and *Hospital Administration Currents* enjoy wide readership.

ROSS ROUNDTABLES

These informal seminars, held in collaboration with the Ambulatory Pediatric Association, provide critical presentations and discussions of common pediatric problems. Just recently inaugurated, these seminars have so far dealt with *Urinary Tract Infections In Childhood* and *Obesity In Pediatric Practice*.

ROSS DEVELOPMENTAL AIDS

These booklets provide individual discussions of emotional problems and behavioral disorders in children to help in counseling parents.

CLINICAL EDUCATION AIDS

This series of large wall charts in full color and notebook charts vividly present various aspects of infant physiology, anatomy and development for nurse education and patient demonstration.

PATIENT COUNSELING BOOKLETS

Individual booklets on various subjects to assist the physician in counseling parents.

QUALITY PRODUCTS

Similac® and Similac With Iron infant formulas, Similac ISOMIL™ hypoallergenic formula, Similac ADVANCE™ liquid food, Pedialyte™ oral electrolyte solution, Pediamycin™—erythromycin ethylsuccinate, Rondec D, S, C and T™—pseudoephedrine and carbinoxamine, Rondec DM™—pseudoephedrine, carbinoxamine, glycerol guaiacolate and dextromethorphan, and Vi-Daylin® vitamins provide physicians with products of unexcelled quality and reliability for their care of infants and children.

MOUNT CARMEL HOSPITAL

Columbus, Ohio

For students of medicine of every age, and especially for the graduating students of Ohio State University, we wish for —

- A clear understanding of life's purpose
- Joy and enthusiasm for your life in medicine
- Restlessness to be superior in knowledge and skill
- Contentment in work well done.

1972 Caducean Staff

To my readers:

This book almost didn't happen, being complicated by a predecessor that was very late, a staff that was very small, and a budget that was very tight. But it finally *did* happen, and for one reason.

I enjoyed my four years at O.S.U.'s College of Medicine, mostly because of the 150 with whom I shared the Class of 1972. It was for them, my classmates, that I endeavored to make this a memorable volume. I hope that I've succeeded.

Many thanks to David, who was always there; to Connie, who balanced the books; to Dr. Williams and the secretaries, who were patient and understanding beyond belief; and to the Yashica Mat 124, who made me look like a photographer.

Sincerely

Linda Parenti, M.D.
Editor, 1972 *Caducean*
